

Section 4 of 4 — Challenges & Learnings

Career Compass SG · Module 1 Assignment · Group 7

Your time: 1:15 (official range 1–2 min) · You close the presentation

Your job in one sentence

End the talk with what we learned and where this goes next. Short, honest, and memorable — the last thing the room hears is yours, so land the closing line cleanly.

Where you sit in the flow

	Section	Time	Official guide
	1 · Business case & objective	2:15	2–3 mins
	2 · Process & data handling	3:30	3–4 mins
	3 · Dashboard / app walkthrough	3:00	3–4 mins
→ YOU	4 · Challenges & learnings	1:15	1–2 mins

Section 3 hands you: "...my teammate will close with what this project taught us." **You end the presentation** — then open the floor for questions.

Script

Part 1 — Three lessons (0:00 – 0:50)

(Slide: three short bullets)

Three things this project taught us.

One — plot every number against time before you trust it. The June 2023 break was invisible in summary statistics. It only appeared when we drew it — and missing it would have flipped our conclusions.

Two — when one row means two different things, the code must enforce the difference. Our category split double-counted jobs for an hour — and the wrong number looked believable.

Three — a chart's job is one sentence. Our first opportunity map labelled all 43 categories and was unreadable. Nine labels made the point instantly.

Part 2 — Next steps (0:50 – 1:05)

Next steps: parse full job **descriptions** for skills, not just titles — and **host it online with saved profiles and alerts**, so the user hears when their track's score moves.

Part 3 — Close (1:05 – 1:15)

(Slide: the closing line)

One sentence to take home:

The best-paying career track and the easiest-to-enter career track are almost never the same track. Career Compass shows you both — and lets you decide which one you need this year.

Thank you. We're happy to take questions.

Numbers you must know cold

Figure	Value
The three lessons	plot vs time · enforce structure · one sentence per chart
The June 2023 break	views 111 → 5 · zero-application 18% → 79%
The double-count bug	1.66M shown instead of 1.04M, for an hour
Next steps	skills from descriptions · hosting · profiles + alerts

Questions you own

"What was the hardest part of the project?"

The June 2023 discovery — not finding it, but accepting what it meant: throwing 80% of the engagement data out of the competition metric and labelling that on every page. Honest numbers over impressive ones.

"What would you do differently next time?"

Plot every metric against time on day one, not day three. And set up the posting-ID de-duplication before building any page, not after shipping a wrong number to ourselves.

"How would this become a real product?"

The analytics already handle a million rows in 15 seconds. What's missing is hosting, user accounts, and a scheduled data refresh — engineering work, not research work.

"Any limitations we should know about?"

Three, all stated in the app: salaries are advertised bands, not offers; skills are title keywords, not a full census; and the poster is often a recruitment agency, not the actual employer.

Rehearsal checklist

- ☐ Timed at **1:15 or under**
- ☐ The three lessons delivered as three crisp sentences, not paragraphs
- ☐ The closing two sentences from memory, eyes on the room
- ☐ You know who owns which question topic (see PRESENTATION.pdf)
